

How to Use the Internet

By Teachers,
For Teachers

in Your Classroom

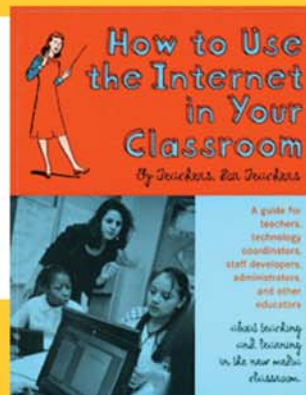

Whether you're a technology wiz or a neophyte, using the Internet in your classroom is a learned skill. Here are engaging, fun ways to add new and exciting strategies to your pedagogic repertoire. We'll teach you how to motivate your students by using the Internet in the classroom. Then, go from novice to knowledgeable—incorporating tools such as wikis, digital images, streaming video, blogs, and interactive web resources for instruction.

Nine Online Courses

- 1) **Becoming a Tech-Savvy Teacher**—An overall introduction to integrating technology into the K-12 curriculum.
- 2) **Internet Projects for the Classroom**—An overview of three specific kinds of commonly used web-based classroom projects.
- 3) **Information Literacy**—Teachers learn the crucial skill of evaluating web sites for classroom use and how to share that knowledge with students
- 4) **Internet Safety**—This course aims to increase both student and teacher awareness of some of the dangers that are inherent with web use, and how to combat them.
- 5) **All About WebQuests**—This course takes teachers through an overview to WebQuests, a dynamic, inquiry-based Internet project for the classroom.
- 6) **Stop, Look & Listen: Digital Audio-Visual Resources**—Teachers will explore new audio-visual resources found today on the web: digital images, podcasts, and streaming video.
- 7) **Going Public: Writing & Publishing on the Web**—Using blogs, wikis, and online maps, we will examine how web publishing can be a powerful tool for the classroom.
- 8) **Digital Storytelling**—Teachers are introduced to digital storytelling, and will explore methods and mediums to compose web-based digital stories.
- 9) **Reading & Writing in the Digital Age**—This course examines ways to integrate digital literacy into the curriculum, explores how digital technologies are changing and enhancing students' literacy, and uncovers new methods for reading and writing in the digital age.

Teachers use our best-selling book, *How to Use the Internet in Your Classroom*, two companion CD-ROMs—*How to Use the Internet in Your Classroom* and *Making the Most of the Web with Your Students*—and eight online courses—to learn how best to use the Internet in their classrooms.

Our book, *How to Use the Internet in Your Classroom*, demonstrates how teachers use technology in the classroom. Teachers from around the country share their stories, strategies, and ideas on using the Internet to enhance their teaching and motivate students.

The companion double CD-ROM set provides educators with tools to successfully integrate technology into the K-12 curriculum through videos of teachers in action, tips on student activities using technology, as well as links to high-quality resources for the classroom. Watch teachers in action as they embark on blogging and podcasting with their students.

Have access to all the rich resources available at www.teachersnetwork.org—the #1 award-winning education web site, by teachers for teachers—proud recipient of The Association of Educational Publishers' Distinguished Achievement Award for Best Portal in Technology.

All courses are conveniently available online from a teacher's home or school computer.
