

Possible Topics for GeoScience Specialist Teams:

These general topics allow for flexibility in assigning topics, and also break some BIG topics into more focused areas so that kids with interests can work within limits.

Earthquakes: Measuring and Monitoring the Dynamic Forces

Earthquakes: Past, Present, and Future- Can We Engineer Safety?

Volcanoes: Human History

Volcanoes: Modeling these doors to Inner Earth

Rocks and Minerals- Recognitions and classification

Rocks and Minerals- The Rock Cycle

Plate Tectonics- Diverse Evidence for the Theory

Plate Tectonics- Models to understand the processes

Earth's Structure- Evidence for the unseen

Crust formation, and Erosion
