

## Students as Teachers- Creating Activities, with Pre/Post learning products

Above- students are adjusting their pre-drawn ideas about the mechanics of volcanoes, based on interaction with animated model on website. Students are teachers.

Step One: After modeling of activity by “teachers”, students observe and draw distinct crystal structures of similarly “clear” materials.....5X eyepieces to view

Right- Step Two... students are deciding which of their drawings of white crystals.... (5X magnified) match the mystery view displayed with digital microscope at 50 X)
